The TE-33 Series

MAXON®

Optional Features

- Hand held control
- Cab Cut-off
- Power down
- Single or Dual Cart stops
(Steel/Aluminum platform only)
- Galvanized finish

Large Wedge-Type Platform Design

The TE-33 features large 48" x 84" and 52" x 84" wedge-type steel or steel/aluminum platforms. The Steel/Aluminum platforms come optional with single or dual cart stops. The wedge design allows smooth transition of load on and off the platform.

Twin Cylinder Design

The TE-33 features a twin cylinder, mid-arm design resulting in great performance and stability.

Hydraulic Locking

The TE-33 features a hydraulic lock valve that takes operator involvement out of the equation. As soon as the control button is released the gate is always securely locked.

Bolt-On Steps & Extension Plate

The steps and extension plates were strategically designed to bolt-on in order to avoid welding on the gate that would affect the factory paint. The steps were also designed as an integral part of the gate that would easily allow for them to be exchanged in case of dock damage.

MAXPRO® Paint or GALVANIZED Finish

This patented, Maxon exclusive paint process has a tough polyurea top coat and an AL rich primer that combat corrosion and keep the liftgate looking like new. For even more corrosion protection, the TE-33 is also available in a galvanized finish.
