CORONAVIRUS (COVID-19)

WE REMAIN OPEN AS AN ESSENTIAL BUSINESS, as we manufacture truck bodies needed to transport parcels, food, medicines, vaccines, etc.

We apply the measures of the Government of Quebec to counter Covid-19.

Many effective health standards have been implemented since the beginning of this crisis, to ensure a safe environment for our staff, our partners and our customers:

VALIDATION OF SYMPTOMS RELATED TO COVID

- **Systematic questioning**, on automated terminals, **of the state of health** of all employees and visitors at the entrance.

DISTANCING

- **Activities staggered** in time (breaks, meals, start and end of work shifts) **to distribute traffic**.
- Preventive and **safe circulation instructions** within the plant.
- **Modified work assignments** favoring worker distancing.
- **Redevelopment** of common areas.
- **Installation of plexiglass** in customer areas, offices, cafeteria and delivery cars.

SANITARY MEASURES

- Sanitary laboratory for **mandatory hand washing**, on arrival and departure, as well as at each change of sectors.
- **Regular disinfection** of work tools and common areas **by a dedicated team**.
- **Mandatory wearing of personal protective equipment**, such as the procedure mask and visor.
- **Mandatory teleworking** for all employees who do not have to intervene on the assembly line, service or parts departments.
- **Restrictive access** to visitors, customers or suppliers in order to maximize distance, health and safety for everyone.
- **Promotion of virtual meetings** (Teams, Zoom, etc.) in order to promote exchanges.

We thank our employees who are committed to providing a quality product.

TOGETHER WE ARE STRONGER.
